Lovana USA proudly introduces the new Lovan Plasma/LCD Lift. The Lovan Lift is manufactured with high gauge steel with an extremely small profile. The Lovan Lift comes fully assembled and ready to "Plug and Play".

The Lovan Lift is one of the most versatile in the industry because of its compact design and lifting power. It can be used in any room of your home, and can be used to lift a television, or a cappuccino machine or a mini bar (the possibilities are limitless).

Because of the strength and reliability of our lifts, they can be used in commercial settings as well. Whether at the office to raise a plasma or LCD television from a mobile cabinet, in a hotel room or in a home office, the Lovan Lift offers maintenance-free dependability and elegance.

Lovana Lifts are perfect for recreational vehicles, yachts and aircraft as well. They are solid and reliable and perform well even in a moving vehicle.
