

# Lovan Sovereign Equipment Racks

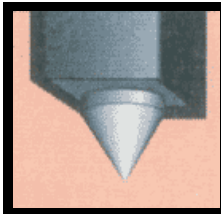

## Special Features Set Sovereign Apart:

- ~ Extra -large 23.5"-wide by 18"-deep shelves accommodate space-hungry audio/video components.
- ~ Tripod support-leg design ensures outstanding stability.
- ~ Art Deco end caps and curving shelf fronts add a touch of elegance.

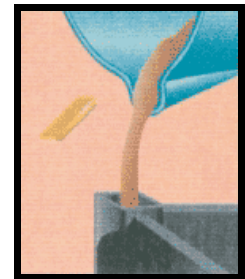

Tapered top caps hold points firmly in place.

Large-diameter cone point spikes isolate components from each other -- and the entire rack from the room.

Thick sonically superior New Zealand Lake Pine MDF shelves ride on vibration-damping soft rubber pads.

Large-diameter vertical support tubes can be filled with sand or shot for extra vibration control.

## Lovan Sovereign Series Equipment Racks

Striking design stacks up to superior performance with Lovan's self-stacking Sovereign Series modular racks. Sovereign racks are composed of separate shelves that fit perfectly on top of one another for a rigid, resonance-free fit. Shelves are coupled by large diameter cone point spikes in a unique "trisolation" system that prevents vibration from traveling from one shelf to the other. And Sovereign's three-legged design offers exceptional stability and makes leveling the rack easy.

Lovan Sovereign Series racks are fabricated from large-diameter vertical supports made from first-quality, high-carbon steel and the shelf supports are welded to the shelf frame for exceptional rigidity. Shelves are extra-large to accommodate big gear--large turntables, CD transports, laser disc players and power amps--a generous 23.5" wide by 18" deep--and ride on soft rubber vibration damping pads. All shelves are constructed of solid 12mm-thick New Zealand Lake Pine MDF carefully chosen for its superior sonic qualities. Vibrations are further controlled by the strategic use of adjustable hardened steel cone point spikes between each of the four shelves. The legs can be filled with sand or shot for further resonance control.

From the "art deco" concentric square caps to the gracefully curved front of the double-thick shelves, no detail has been overlooked, to ensure that both the looks and performance of the Sovereign racks are unsurpassed.

## Lovan Sovereign Audio & Video Component Rack

The Lovan Sovereign racks features four extra large shelves made of 12 mm-thick solid MDF, with 7" of useable space between the shelves. Sovereign racks are made of large-diameter, high-carbon steel legs welded to strong steel crossbars. Overall height is 37". Shelves measure a full 23.5" wide by 18" deep. The top shelf can accommodate up to a 29" tv. Adjustable steel con points between each shelf provide resonance control.

## Extra-Tall Lovan Sovereign Audio Equipment Rack

The Lovan Sovereign Series Hi Fi Equipment rack combines an artistic "deco" look with heavyweight performance, thanks to its unique three-legged "trisolation" system design. It's perfect for space-hungry hi-fi and audio/video components. Racks are made of large-diameter, high-carbon steel legs welded to strong steel crossbars. Four hard-working 12mm-thick solid MDF shelves are a full 23.5" wide by 18" deep, with 10" of vertical space between shelves. Overall height is 49". Top shelf can accommodate up to 29" television. Steel spikes between each shelf provide superior resonance control.
